

## FOOD AT MAS CAMPASSOL

At Campassol we only want to offer snacks, homemade dishes and at the same time show the magnificent alternatives there are to the consumption of animals.

We are committed to nature and its inhabitants. Our mission is to propose a coexistence based on respect and protection.

For this reason, all the products we offer are plant based and without palm oil.

### **Sustainability**

We rely on seasonal, local and proximity ingredients. Not being of animal origin, they do not contribute to the deforestation of the jungles, to the pollution of the air and aquifers, the degradation of vegetation, soil erosion and the great loss of biodiversity, that is, some of the most important causes of climate change and the destruction of our habitat.

### **Health**

We offer food free of animal suffering, pesticides, hormones, antibiotics and other medications present in animal feed, as well as GMOs, prohibited in human food, but allowed in feed, so the remains of modified genes of the plants end up in the same place...

### **Ethics**

As it could not be otherwise, our foods are free of animal abuse. We believe that the change in our relationship with the beings we share our habitat must begin by stopping exploiting them.

Food scraps are not wasted, they enter the food circuit through composting, fertilizing the land and producing better vegetables to feed us healthily.

**Proteins** are essential for our body and if we choose those of plant origin, in addition to protecting the planet, we promote our cardiovascular, metabolic and kidney health.

Some of our snacks contain processed ingredients; this is because the philosophy of our gastronomic offer is that the dishes are easy to prepare by our guests at home and we explain where they can purchase them, in order to reduce the consumption of animals in their daily lives.

They are perfect foods to transition to a plant-based diet, thus contributing to a smaller footprint on the planet, health and animal suffering.

**Be the change you want to see in the world... with the power of small actions, we can make this planet a better place for everyone...**

**It's not about stopping eating... it's about letting live.**

**If you change your diet you change the world you live in...**

## To start
